DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 28, 2005 has been entered.

Response to Amendment

The Amendment, filed on April 28, 2005, has been entered and acknowledged by the Examiner.

Cancellation of claims 10-16, 24 and 25 has been entered.

Claims 1-9, 17-23 and 26-31 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the title, pursuant to MPEP 606.01, the title has been amended as follows,

-- METHOD OF MANUFACTURING FIELD EMISSION DEVICE HAVING INSULATED COLUMN LINES --.

Allowable Subject Matter

Claims 1-9, 17-23 and 26-31 are allowed over the prior art of reference.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitations of forming at least one micropoint emitter on the substrate and in contact with both the resistive layer and the insulative layer, and forming a dielectric structure spaced from the at least one micropoint emitter and between the insulative layer and the grid structure.

Regarding claims 2-9, claims 2-9 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 17, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 17, and specifically comprising the limitations of forming a resistive layer directly on a top surface of the elongated conductive structure and over at least a portion of a side surface thereof, forming an insulative layer covering a top surface of the resistive layer and leaving at least a portion of a side surface thereof exposed, and forming a micropoint emitter over the substrate in lateral contact with the resistive layer and the insulative layer.

Regarding claims 18-23, claims 18-23 are allowable for the reasons given in claim 17 because of their dependency status from claim 17.

Regarding claim 26, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 26, and specifically comprising the limitations of forming at least one micropoint emitter on the substrate and in contact with both the resistive layer and the insulative layer, and forming a dielectric structure spaced from the at least one micropoint emitter and between the insulative layer and the grid structure.

Art Unit: 2879

Regarding claims 27-31, claims 27-31 are allowable for the reasons given in claim 26 because of their dependency status from claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
